

Rubrik and MINDTREE VAULT

THE NEED FOR CYBER-RESILIENT DATA PROTECTION

Modern organizations recognize that they need to mitigate the risk posed to their data by cyber-criminals and ransomware. Unfortunately, industry statistics continue to show that it's harder to do than expected. Just last year, the FBI reported a rise of 62% in complaints about ransomware¹, and according to IDC, approximately 37% of global organizations said they were a victim of some sort of ransomware attack². In addition to new strains of ransomware coming online, older versions are being modified to use new exploits. Vulnerabilities in supply chains have also left CISOs explaining to the board that their business's attack surface is larger than previously thought.

Organizations that recognize they are at risk want to move quickly, and they want assured outcomes. They also want to benefit from modernization that goes beyond cyber resilience. Modern data protection must deliver on the need for advanced automation and analytics, fast cloud adoption, regulatory compliance, and provide simple rapid recovery on demand.

DATA DRIVEN AGILITY WITH ZERO TRUST DATA SECURITY™

Data has never been more important, or more valuable – to you and sadly, to cyber-criminals. As sectors such as banking and finance, healthcare, life sciences and retail have accelerated transformation programs, they have also discovered that legacy backup is a big risk and cannot be relied upon for recovery in the event of ransomware attack. It's complex, can be vulnerable to ransomware itself, and is often slow at recovery and slow to change to meet business needs.

The MINDTREE VAULT service enables you to move quickly away from your existing backup and disaster recovery systems. It includes an assessment, discovery, and migration with on-going management services, by backup and ransomware experts. This includes pilots for proof-of-concept projects as your business changes to meet new challenges.

MINDTREE VAULT

SCOPE & DELIVERY		MANAGED SERVICE	
Backup & Cyber Expertise		Data Protection	Detection & Remediation
Assessment & Discovery			
Implementation & Migration			Expert investigation, incident containment and sensitive data discovery
Transformation: Managed Pilots

THE BENEFITS OF MINDTREE VAULT POWERED BY RUBRIK

The combination of MINDTREE's in-depth expertise in advisory and managed services and Rubrik's zero-trust data protection platform provides you with a complete cyber-recovery solution.

Your fast-track to guaranteed ransomware recovery

- **Fast:** MINDTREE has a strong and proven partnership with Rubrik and other key alliance partners, which allows them to ensure your project is delivered on-time and in line with industry and security best practice – a MINDTREE differentiator which they call Operational Best Practice. The MINDTREE advisory service will enable you to develop a security and data protection strategy, and finalize the business case for implementation
- **Secure:** MINDTREE VAULT combines deep security and implementation knowledge with the Rubrik Zero Trust Data Security platform for data protection. This uses secure access controls, end-to-end encryption, and retention lock technology to ensure backup data is immutable and beyond the reach of ransomware. MINDTREE's expert staff use Rubrik Ransomware Investigation's anomaly detection technology to spot ransomware activity, contain the incident to stop an attack before it becomes critical, and perform any necessary remediation tasks
- **Modern:** every business needs to be agile, which is about more than keeping your data safe from cyber-attacks. MINDTREE chose Rubrik because of our hybrid-cloud, automation, and API capabilities, combined with lower TCO. All of these enable businesses to shift quickly to a data driven model, and remain able to meet future transformation goals
- **Simple:** managed services from MINDTREE take the pressure off your own IT department, and they also make it easy for your business to scale as needed. The ability to run pilots or proof of concepts makes the adoption of new technology simpler, meaning new digital programs can go live faster
- **Guaranteed:** when a recovery is needed, MINDTREE VAULT and Rubrik ensure that the last clean copy of your data is instantly available from immutable, air-gapped storage – on-premises or in the cloud. Near instant restoration of business-critical apps is orchestrated to make it simple, even if the app itself is complicated, guaranteeing that your business is back on track in minutes, not days

ABOUT RUBRIK

Rubrik, the Zero Trust Data Security Company™, delivers data security and operational resilience for enterprises. Rubrik's big idea is to provide data security and data protection on a single platform, including Zero Trust Data Protection, Ransomware Investigation, Incident Containment, Sensitive Data Discovery, and Orchestrated Application Recovery. This means data is ready at all times so you can recover the data you need, and avoid paying a ransom. Because when you secure your data, you secure your applications, and you secure your business.
